

# RiskPACC

Integrating Risk Perception and Action to  
enhance Civil Protection - Citizen interaction

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 101019707.

## ABOUT RISKPACC

Increasingly complex and interconnected risks globally highlight the need to enhance individual and collective disaster resilience. Awareness of risks and levels of preparedness across Europe remain low with gaps between the risk perceptions and actions of citizens, and between the risk perceptions of citizens and Civil Protection Authorities (CPAs). The RiskPACC project seeks to further understand and close this Risk Perception Action Gap (RPAG). Through its dedicated co-creation approach and its seven case studies, RiskPACC will facilitate interaction between citizens and CPAs to jointly identify their needs and develop potential procedural and technical solutions to build enhanced disaster resilience. Importantly, RiskPACC will provide an understanding of disaster resilience from the perspective of citizens and CPAs, identifying resilience building initiatives and good practices led by both citizens (bottom-up) and CPAs (top-down). The “Risk Pack” of solutions will include a framework and methodology to understand and close the RPAG, a repository of international best practice and toolled solutions based on new forms of digital and community-centered data and associated training guidance.

## RISKPACC OBJECTIVES

- Understand and close Risk Perception Action Gap (RPAG)
- Facilitate interaction between citizens and CPAs
- Develop potential procedural and technical solutions to build enhanced disaster resilience
- Provide an understanding of disaster resilience from the perspective of citizens and CPAs
- Facilitate collaboration between citizens, CPAs, CSO, researchers and developers
- Provide the “risk pack” of solutions that will include a framework and methodology to understand and close the RPAG
